

Swasthya Mitra

Smart Healthcare & Management System

UI/UX Design & Prototyping using Figma — A smart doctor appointment and healthcare management platform designed for simplicity, security, and faster access to care.

Created by: Prithwijit Khan, Ayan Koley

Roll Nos: 18842725073, 18842725097

College: Techno College Hooghly

Department: Bachelor of Computer Application

Problem Statement

Patients face friction when accessing care: long in-hospital waits, difficulty finding specialists, manual appointment booking, fragmented medical records, and weak patient–doctor communication. These barriers reduce satisfaction and delay treatment.

Project Objectives:

- Reduce wait time
- Centralize records
- Improve communication
- Make booking effortless

Primary Goals

Reduce wait time • Centralize records • Improve communication
• Make booking effortless

Target Users

Patients, general practitioners, specialists, clinic admins

Key Features

Patient Features

- User Registration
- Secure Login
- Search Doctors
- View Doctor Profiles
- Book Appointments
- Patient Dashboard
- Appointment History

Website Features

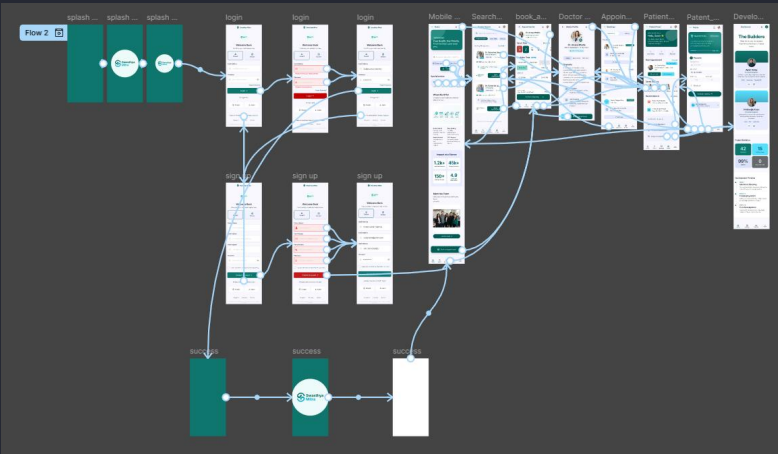

- Responsive Homepage
- About Us Page
- Doctor Listings
- Developer Information

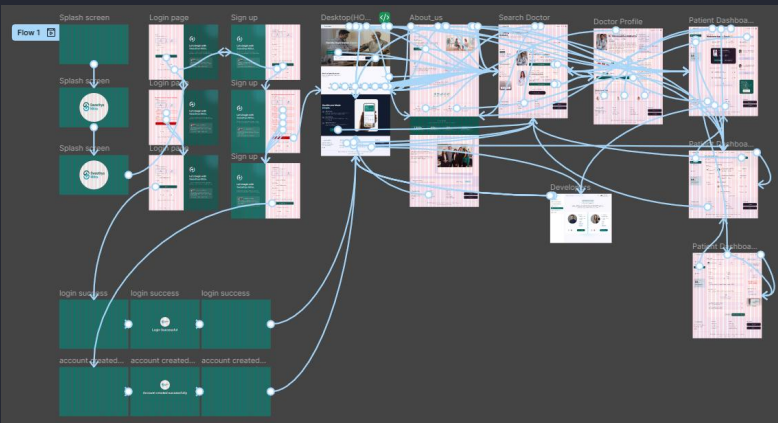

Security

- User Authentication
- Protected Patient Data

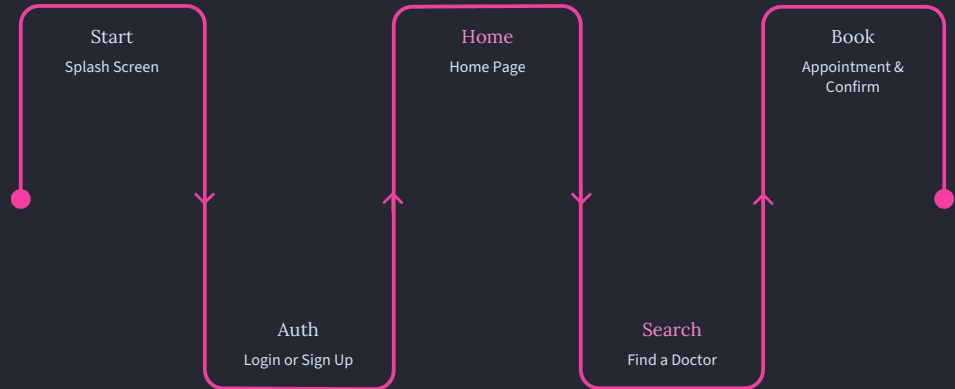

Mobile

Desktop

User Flow Overview

This streamlined flow minimizes taps between discovery and booking, with checkpoints for authentication, doctor details, and confirmation to reduce errors and no-shows.

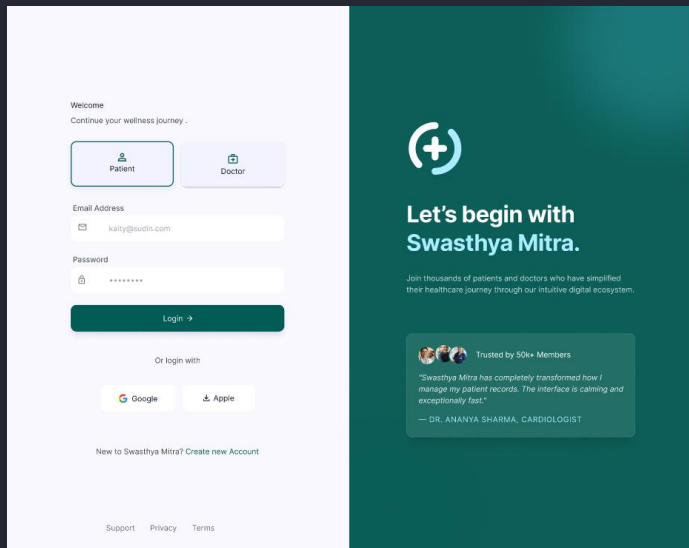

UI Storyboard – Splash Screen

The Splash Screen is the first screen displayed when the application starts.

Purpose:

- Displays the application logo
- Builds brand identity
- Initializes application resources
- Redirects users to Login Screen

Welcome
Continue your wellness journey .

Home Page — Design Highlights

- Prominent Search Bar to find doctors by name, specialty, or location
- Featured Doctors & Services cards with CTAs to book or view profile
- Quick access to Patient Dashboard, Appointment History, and Support
- Responsive layout ensures consistent experience across devices

UI Storyboard – About Us

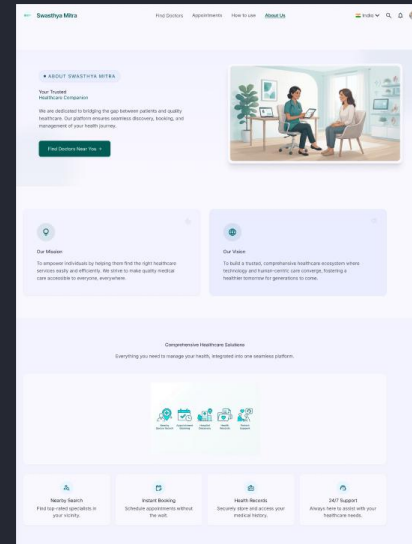

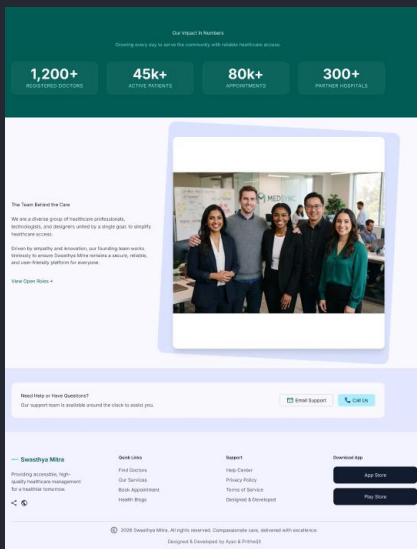

The About Us page provides information about the organization.

Mission

To empower individuals with effortless access to quality healthcare, fostering a healthier community through technology and compassionate service.

Vision

To be the leading digital health platform, recognized for innovation, reliability, and enhancing patient-provider connections globally.

Healthcare Goals

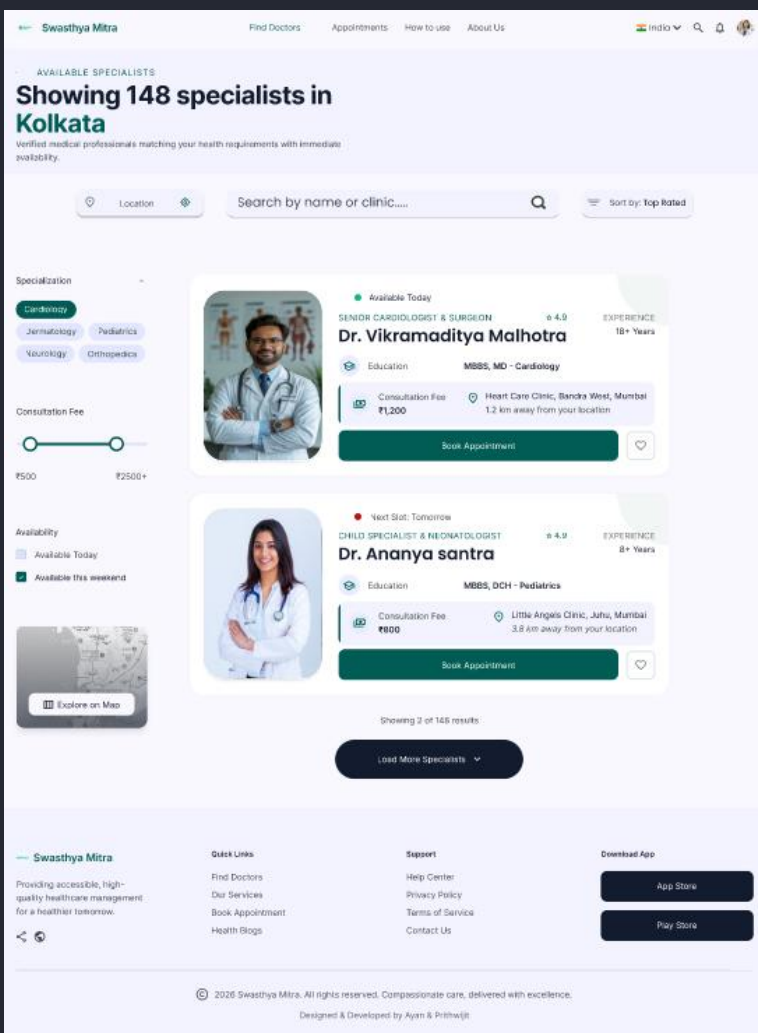

Reduce wait times, centralize medical records, improve communication, and simplify appointment booking for all users.

Team Information

Highlighting the dedicated team of developers, designers, and healthcare experts driving the platform's success.

Purpose:

Build trust with users

UI Storyboard – Search Doctor

Allows patients to search doctors based on their needs.

Features:

- Doctor List
- Search Bar
- Filter Options
- Specialization
- Availability

Purpose:

- Makes finding the right doctor simple and fast

UI Storyboard – Doctor Profile

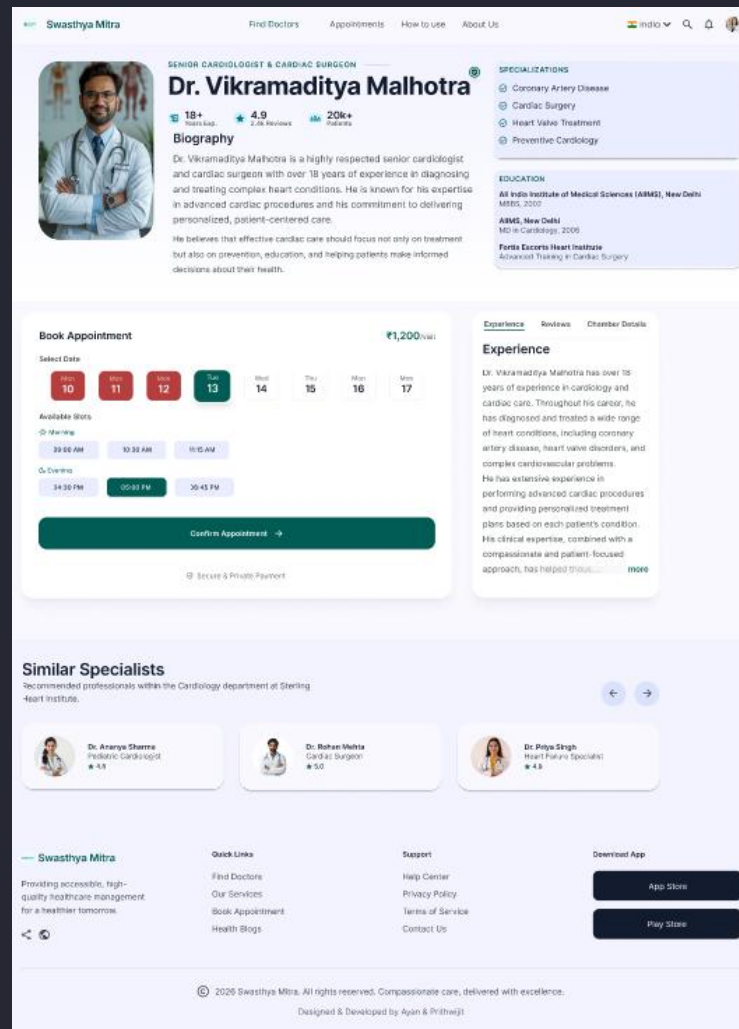

Displays detailed information about a selected doctor.

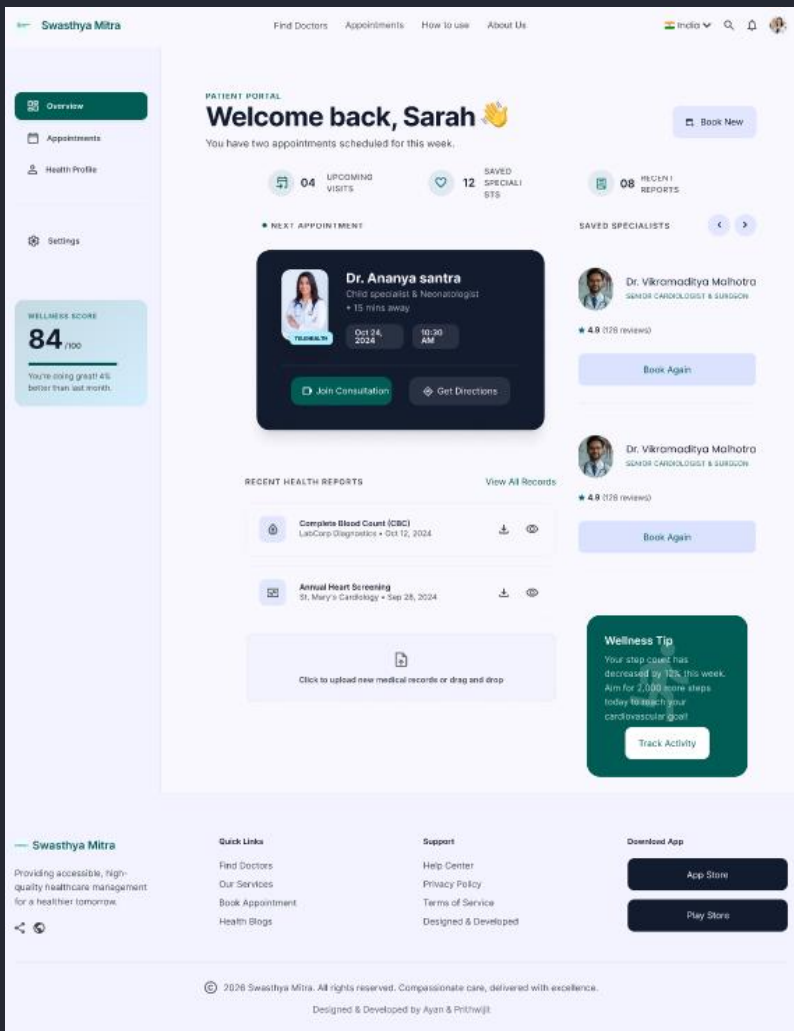

Information Includes:

- Doctor Photo
- Qualification
- Experience
- Specialization
- Ratings
- Availability
- Book Appointment Button

Purpose:

- Helps patients make informed decisions

UI Storyboard – Patient Dashboard (Overview)

- Welcome panel with quick actions: Book, Cancel, Reschedule
- Upcoming & past appointments with doctor details and status
- Centralized medical records: reports, prescriptions, and visit history
- Notifications and secure messaging with providers

UI Storyboard – Patient Dashboard (Appointments)

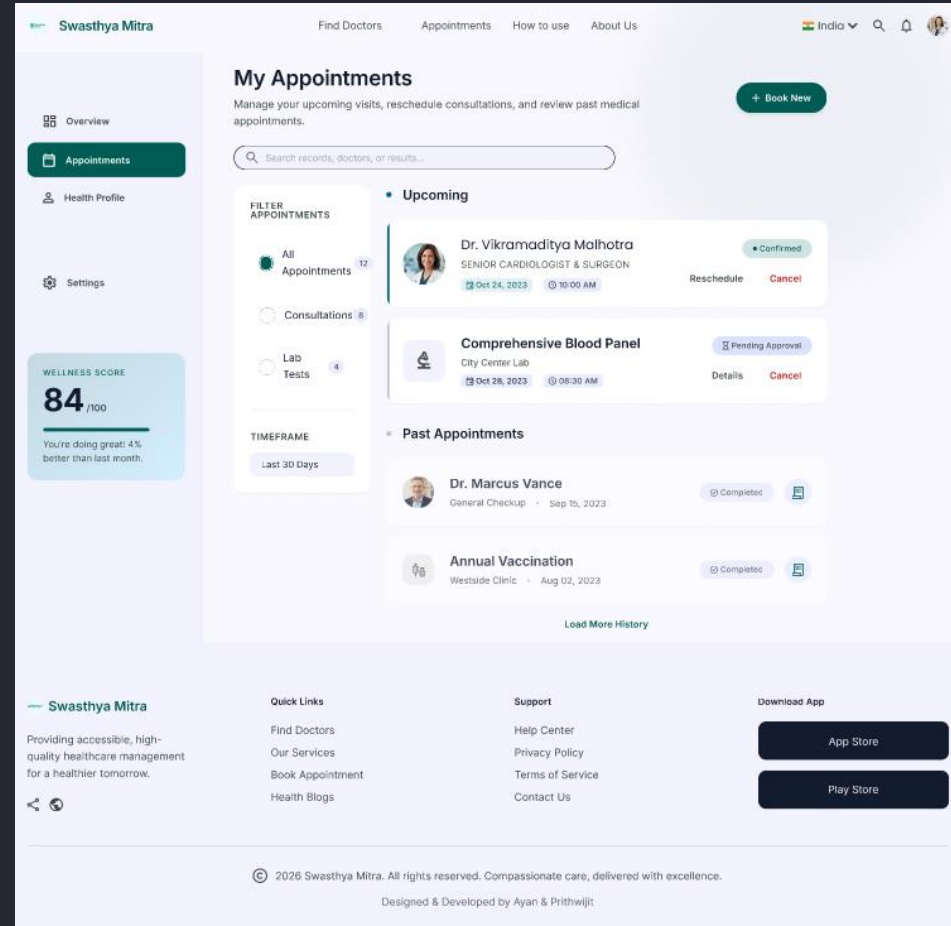

Displays appointment information.

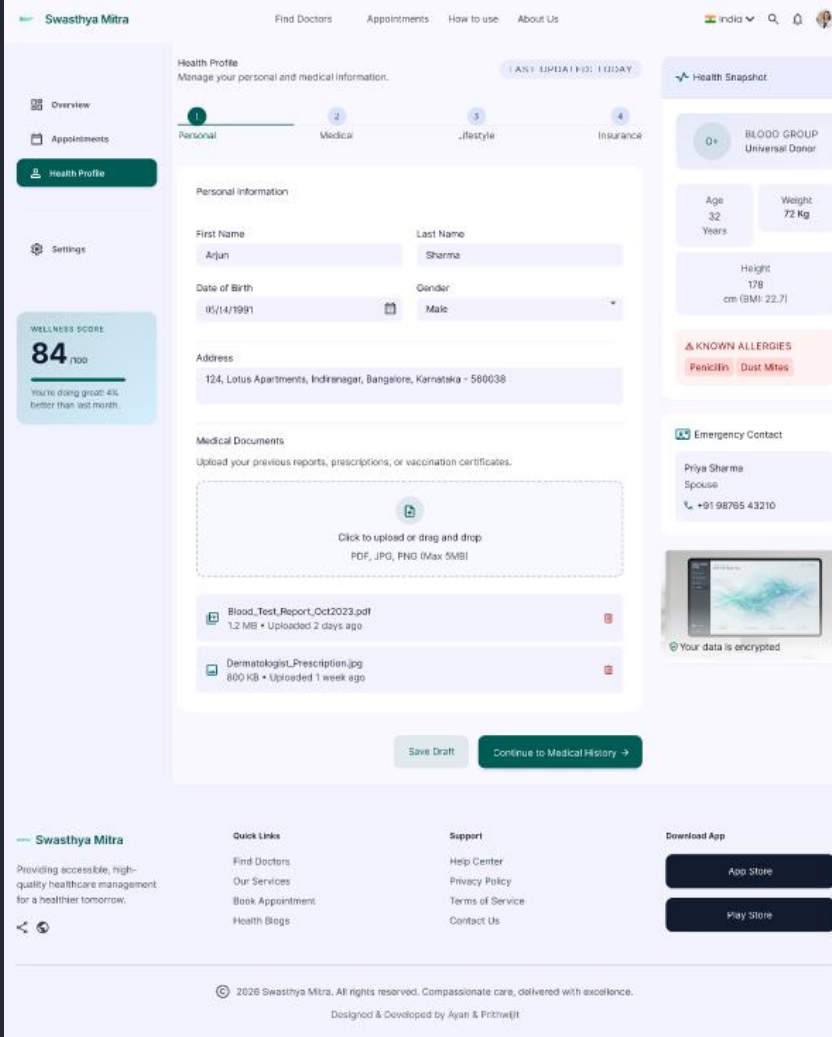

Features:

- Upcoming Appointments
- Previous Appointments
- Appointment Status
- Doctor Details

Purpose:

- Helps patients manage their appointments efficiently

UI Storyboard – Patient Dashboard (Medical Records/Details)

Provides detailed healthcare information.

Features:

- Medical Records
- Reports
- Appointment History
- Health Information

Purpose:

Maintains organized digital healthcare records

UI Storyboard – Developers

Displays information about the project development team.

Includes:

- Team Members
- Roles
- Contact Information
